Konditionalis 2

Form: If + past tense, would + verb

if everyone drove electric cars	air pollution would drop significantly
if industries used cleaner technologies	the planet would be healthier
If we planted more trees	we would slow down climate change
if everyone used public transport	traffic congestion would be lower
if companies invested in eco-friendly packaging	waste would decline
if politicians prioritized climate policies	global warming would slow down
if people cared more about biodiversity	endangered species would survive
if governments taxed carbon emissions	companies would reduce pollution
if people reused products	waste would decrease dramatically

[illegible]

Villkorsbisatser

unless we act now	global warming will accelerate
provided that countries cooperate	we can achieve sustainability
as long as we protect biodiversity	ecosystems will remain stable
even if we reduce emissions	the effects of climate change will persist for decades
unless we reduce carbon emissions	the planet will face extreme weather
provided that renewable energy becomes affordable	more people will adopt it
as long as forests are protected	wildlife will thrive
even if we recycle	we still need to cut down overall consumption
unless we protect the oceans	marine species will disappear
provided that we act collectively	climate change can be slowed down
even if technology advances	we still need to change our habits

[illegible]
